

Choose the natural, eco-safe alternative and get the highest SAFESHIELD" WATERBLAST EC910-16

High pressure waterblasting is gaining popularity as a non-polluting safe method for industrial cleaning, stripping and removal of corrosion, paint, chemical and organic residues. Due to the extremely high pressures found in waterblast applications, safety is key and Eaton's new SAFESHIELD waterblast hose is designed for ultimate protection while providing the best performance in the industry.

Eaton's new SAFESHIELD EC910 hose assemblies offer pressures capable of meeting the most stringent of these applications. Eaton has supplied reliable high quality waterblast hose assemblies for decades. The SAFESHIELD EC910 is designed as the next generation of high pressure waterblast hose with a higher level of reliability and safety.

Eaton's new EC910 hose, internal skive fittings and/or hose assemblies are available in sizes, -08, -12, -16, and are approved for pressures from 1100 bar (16,000 psi) to 700 bar (10,000 psi) in order to withstand the higher pressure requirements for waterblast applications. EC910 has a special steel wire reinforcement construction and an excellent abrasion resistant cover resulting in increased strength while providing good flexibility for long service life and ease of handling in the field.

Applications:

- Stripe removal
- Water treatment facilities
- Marine surfaces
- Stucco removal
- Runway cleaning
- Swimming pool cleaning
- Paint removal
- Bridge renovation

Features:

- Sizes -08, -12 and -16
- Four heavy spiral wire construction
- Eaton's highly abrasion resistant DURA-TUFF hose cover
- 2.5:1 hose safety factor
- Sold in 50 foot hose lengths
- Exceeds ISO 7751 performance
- Meets global specifications EN1829-2 (impulse) and AS/NZ4233.2

Benefits:

- Eaton manufactured and assembled 50 foot hose assemblies provide customer security, knowing that the assemblies were made by professionally trained Eaton personnel
- Superior hose flexibility provides ease of use in the field
- Pre-cut 50 foot lengths of hose reduces scrap created during the assembly process

^{* 50} foot cut lengths. Orders must be placed in 50 foot increments.

Construction

Synthetic rubber inner tube, 4 heavy spiral wire reinforcement and highly abrasion resistant DURA-TUFF synthetic rubber cover

Approved Applications

Waterblast service with water, water-soap emulsion exceeds ISO 7751 requirements

Operating Temperature Range

Max Operating Temperature: -40°C to +93°C [-40°F to +200°F]

Continuous Service Temperature

-10°C to +80°C [-14°F to +176°F]

Only Eaton Approved Internal Skive Hose Fittings

Eaton Waterblast Hose Assembly Program

Eaton manufactured hose assemblies are designed and assembled for the most demanding waterblast applications. "Made by Eaton" means your customers know they are using the highest quality products available in the market place assembled by professionally trained Eaton personnel. Whether it's paint stripping, vessel cleaning or boat hull debris remediation, safety and quality will never be compromised.

Eaton waterblast hose assemblies are available in 50 foot lengths with qualified NPTF hose fittings from our world class manufacturing facilities.

All Eaton manufactured assemblies are tagged and labeled for easy identification and traceability. All three available hose sizes are color coded and labeled according to WJTA (Water Jet Technology Association) pressure rating requirements.

Eaton's Guardian™ Sleeve offers a higher level of safety in addition to providing longer hose life.

To protect your operators and nearby personnel while operating waterblast equipment, we recommend the use of Eaton's burst suppression Guardian sleeve. Eaton's Guardian sleeve will deflect a hose burst up to 1100 bar (16000 psi) providing peace of mind when using high pressure products.

The Guardian sleeve also has excellent abrasion resistance so it provides longer hose life – it adds an extra layer of protection for the hose assembly from excessive cover wear.

Eaton's Guardian Sleeve -Hose Burst Suppression Sleeve

Properties	Specification	Description
Burst Pressure	1100 bar (16,000 psi)	Capable of containing hose burst up to 16,000 psi
Pin Hole Leak Pressure	280 bar (4000 psi)	Sustained 4,000 psi pin hole deflection from focused 1mm pin hole
Abrasion Cycles	250,000	Survives up to 250,000 Abrasion cycles ISO 6945
